GitHub: https://github.com/Vikash8607 Mobile: 9110085311

Skills

Languages: C++, Python, C, Java.
Tools/Platforms: MongoDB, Tableau, VS code, GitHub, MS SQL Server
Soft Skills: Problem-Solving, Team Player, Time Management

Projects

Sustainable Fashion Website | HTML, CSS, Responsive Web Design

- Developed a website promoting sustainable fashion, featuring eco-friendly clothing, ethical brands, and practical tips for conscious shopping.
- Designed a clean, responsive, and user-friendly interface using HTML and CSS.
- Focused on promoting mindful and environmentally responsible fashion choices through informative content.
- GitHub Repository Link: - View Source Code

IPL Match Winning Probability Predictor | Python, Pandas, Streamlit

- Developed an interactive Streamlit application to predict IPL team winning probabilities using player performance and batting-position statistics.
- Analyzed historical player data including runs, batting average, strike rate, balls faced, dismissals, and batting position.
- Enabled users to select teams and Playing XI and generate comparative winning probabilities through a user-friendly dashboard.
- GitHub Repository Link: - View Source Code

Custom BigInteger Library | C++, STL, OOP, Data Structures & Algorithms

- Developed a custom arbitrary-precision integer library in C++ to perform calculations beyond the limits of standard integer data types.
- Implemented arithmetic operations including addition, subtraction, multiplication, division, modulo, exponentiation, GCD, LCM, factorial, and square root.
- Applied OOP concepts, STL vectors, operator overloading, binary search, and Euclidean algorithms, along with base conversion and comprehensive test cases for validation.
- GitHub Repository Link: - View Source Code

Training

Cipher Schools (Edtech Company) Aug'26

C++ Programming Training

· Successfully completed training in C++ Programming, covering fundamental programming concepts, object-oriented programming, and problem-solving techniques.

· Developed practical understanding of C++ concepts, including variables, loops, functions, arrays, pointers, and object-oriented programming.

· Strengthened programming and problem-solving skills through hands-on exercises and practical coding tasks.

Certificates

Programming Using C++ August 2025
Infosys Springboard — Certificate Link

Python with Libraries January 2024
Skillera — Certificate Link

React.js — 15+ Hours MOOC March 2025
Tech Veda — Certificate Link

Education

Lovely Professional University Punjab 2024-2028
Computer Science and Engineering— CGPA: 6.67 Phagwara, Punjab
Foundation School 2021-2023
Intermediate— Percentage:68.40% Buxar, Bihar
Primus Public School 2020-2021
Matriculation— Percentage:70.40% Muzaffarpur, Bihar
